Trương Công Hải

Full Stack Developer

0909 739 714 conghai.tpma@gmail.com Ho Chi Minh City
LinkedIn - Trương Công Hải Github - trgcghai haidev.id.vn

Objective

Full-stack Developer with experience building scalable system with modern technologies such as ReactJS, NextJS, NestJS, Spring Framework. Familiar with the implementation of RESTful APIs, microservices, EDA architecture with PostgreSQL, Redis, RabbitMQ, Docker. Have experience working with AWS cloud services and using AI agents to enhance productivity.

WORK EXPERIENCE

Apps Cyclone - Frontend Developer *09/2026 – Present*
Technologies: React, ShadcnUI, React Router, Tanstack Query, Web3, Blockchain, SIWE, Viem, Wagmi.

- Built a responsive marketing page from Figma using React, supporting desktop and mobile layouts.
- Implemented secure wallet authentication for dApp on Sepolia using wagmi, viem, and SIWE.
- Developed token transfers, NFT minting, and ERC-20 token creation using wagmi and viem, supporting 3 core blockchain operations with gas estimation and balance validation.

TMA Solution - Full Stack Developer Intern *12/2025 – 04/2026*
Technologies: React, React Router, ShadcnUI, Tailwindcss, Tanstack Query, ExpressJS, S3, MongoDB, PostgreSQL, Multi-tenant.

- Enhanced RBAC of the project management system (PMS) to PBAC, using permission matrix to detect the ability to perform the actions.
- Implemented AI-powered Meeting Notes features for the PMS, generating summary and transcript from an audio file, handle loading and error state.
- Implemented a history audit log to enhance traceability and accountability for tasks in the PMS by using a middleware on the related endpoints.
- Built a global search feature with full-text search and low latency with recorded response time 100ms using MongoDB text indexes.
- Reduced the response time of admin dashboard data from 3s to 200ms by resolving the N+1 query, providing the smoother experience.

Industrial University of Ho Chi Minh city - Full Stack Developer *07/2025 – 09/2025*
Technologies: React, React Router, Redux Tool Kit, ExpressJS, NodeJS, Cloudinary, MongoDB, JWT, i18n, Nginx

- Built a full-stack, end to end CMS using React, React Router, Express.js, and MongoDB, integrating frontend and backend workflows.
- Implemented JWT authentication and RBAC, securing CMS endpoints with role-based permissions.
- Integrated Cloudinary for centralized uploads, storage, and management.
- Implemented i18n for static and dynamic content, supporting 2 languages (English and Vietnamese).

EDUCATION

Industrial University of Ho Chi Minh City *2022 – 2027 (Expected)*

- Major: Software Engineering
- GPA: 3.59 / 4.0
- Scholarship for outstanding academic performance (2023-2026)

CERTIFICATION

English - TOEIC: 900 / 990 *2026 – 2028*

SKILLS

- **Programming:** Javascript ES6, Typescript, Java
- **Frontend Development**: ReactJS, NextJS, Tailwindcss, Redux, Tanstack Query, ShadcnUI, Responsive
- **Backend Development**: ExpressJS, NestJS, NodeJS, Spring Framework, RESTful API
- **Database & Caching**: Dynamodb, Mongodb, MySQL, PostgreSQL, Redis
- **Devops & Tools**: Docker, Docker compose, CI/CD, AWS, Git, Github, Nginx, Linux, Vercel
- **Workflow & AI**: AI Agents, Agent Skills, OpenCode, ChatGPT, Gemini
- **Key Concepts**: OOP, MVC, Microservices, Event Driven, SOLID, Clean Architecture

PERSONAL PROJECTS

D4C Clothing Shop *05/2026 – 06/2026*

Technologies: ReactJs, TailwindCSS, ShadcnUI, Axios, Tanstack Query, Mariadb, DynamoDB, AWS S3, JWT, Redis, Spring Boot, ExpressJs, RabbitMQ, SePay, Docker, Typesense.

- **Microservices:** Eureka for service discorvery, Spring Cloud Gateway as API gateway, ELK for monitoring, and Redis for caching, and rate limiting.
- **Security & Fault Tolerance:** Implemented asymmetric JWT authentication with centralized verification, plus Retry, Circuit Breaker, DLQ, Saga, and Outbox patterns for resilient service communication.
- **Search Engine:** Integrated Typesense for typo-tolerant product search, caching with Redis, recording response time 50ms cached.

Github: https://github.com/trgcghai/D4C_Clothing_Shop

Goat - Job Hunter Platform *03/2026 – 05/2026*

Technologies: Nextjs, Typescript, Redux Tool Kit, Axios, Tailwindcss, ShadcnUI, Spring Boot, Spring AI, Spring Security, Redis, Websocket, DynamoDB, Cloudflare, AWS S3, AWS EB, Agora SDK

- **Authentication & Authorization:** Implemented PBAC with JWT and Redis-cached optimization.
- **Real-Time Communication:** Built low-latency WebSocket messaging and WebRTC voice and video calling with Agora SDK. With recorded response time approximately 300ms.
- **AI & DevOps:** Integrated Gemini with Spring AI for a RAG-based chatbot, containerized backend with Docker and deployed services on AWS.
